VISCOSITY & FUEL QUALITY

TriboVis Basic– Viscosity Test

The TriboVis Basic is a falling ball viscosity meter that comes with PC software for calculating the viscosity at a given temperature without the need for complex tables and diagrams.

Easy usage as well as reliable and repeatable accuracy makes the unit the ideal tool for controlling the condition of the operational fluids on site.

Order No.: 1011

TriboVis Basic

Viscosity Test

- Viscosity test for lubricants and distillate fuels
- Falling ball principle
- Viscosity range from 2.0 cSt to 1000 cSt at 40°C
- PC software for easy evaluation of test results
- No V/T (viscosity/temperature) charts needed
